BROWSE ALL BOOK: JAYPEE BROTHERS

Africa is the most tropical of all the continents; some four-fifths of its territory rests between the Tropics of Cancer and Capricorn. As a consequence, the cultures and the physical variations of the peoples reflect adaptation to both hot, dry climates and hot, wet climates. Dark skin is the dominant characteristic of indigenous African peoples, but skin colour is not uniform.

Although flower bracts of purple, pink or red colour are commonly seen, cultivars are now available in apricot, white, blue, yellow and orange (Gilman, 1999). Currently, both wild and cultivated forms of *B. spectabilis* are commercialized and have probably been introduced repeatedly across tropical and warm temperate regions of the world.
