A concise discussion of the physical layer technologies underlying various networks is also included. Finally, a sampling of topics is presented that are expected to have significant influence on the future evolution of networks including overlay networks like content delivery and peer-to-peer networks, distributed algorithms, Byzantine agreement and source compression.

CS/EE 143 Communication Networks (2018 Fall)

Communication networks refer to the routes through which communication flow to the destination person for whom it is meant. A number of networks may exist in the organization at a given point of time but management should consider the effectiveness of the communication network and its effect on the behaviour of the communicatee before it finally chooses a network.
