### 8K HDMI Fiber Optic Cables | 8K HDMI Extenders | BROVF 30t

Multimode fiber optic cables, on the other hand, have a much larger diametric core (50 to 100 microns), which allows for multiple modes of light to get through.. This means an increased number of light reflections can be created as it passes through the core. That in itself increases the ability of this type of fiber optic cable to transmit more data at any given time.
