### **Vision Aircraft - Pro-Composites**

The reason we don't see more composite traditional designs is because the primary advantage to composite construction is that we can build complex shapes that would otherwise be difficult/heavy to build with traditional wood or metal.. and the main disadvantage, the time it takes to construct composites, means nobody wants to spend twice as much time building an analog to the RV just to say it ...

## **Aircraft Composite Construction - YouTube**

Some aircraft of composite materials began to appear in the late 1930s and '40s; normally these were plastic-impregnated wood materials, the most famous (and largest) example of which is the Duramold construction of the eight-engine Hughes flying boat. A few production aircraft also used the Duramold construction materials and methods.
