COGNITIVE NEUROSCIENCE THE BIOLOGY OF THE MIND Fourth Edition

Life is a quality that distinguishes matter that has biological processes, such as signaling and self-sustaining processes, from that which does not, and is defined by the capacity for growth, reaction to stimuli, metabolism, energy transformation, and reproduction. Various forms of life exist, such as plants, animals, fungi, protists, archaea, and bacteria.

When we embarked on Fundamentals of Human Neuropsychology in 1977, we could not imagine how much the field would change in the next 25 years. An exciting development in neuropsychology has been the use of neuroimaging as a research tool, and we have increased the emphasis on neuroimaging in this new edition in a variety of ways.
