INTRODUCTION. The Centers for Disease Control and Prevention (CDC) defines health care-associated infections (HAIs) as infections acquired while in the health care setting (e.g., inpatient hospital admission, hemodialysis unit, or same-day surgery), with a lack of evidence that the infection was present or incubating at the time of entry into the health care setting ().

Comprehensive Review Dentistry Boucher L

This research explores socio-spatial characteristics of home retrofit projects in New York State and their association with the state's free home energy audit program. Prior work by the authors found that zip codes with more elder individuals and higher levels of education are more likely to undertake an energy audit; it was also found that higher incomes may be negatively correlated ...

Positron Emission Tomography (PET) imaging is a metabolic imaging technique using a radioactive tracer, 18F-fluorodeoxyglucose (18F-FDG), to identify the presence and severity of disease, namely cancers. Most malignant tissues have increased 18F-FDG uptake associated with an increased rate of glycolysis and of glucose transport. The increase in 18F-FDG uptake noted in malignant tissues is ...
