Configuring the bq27505 Data Flash - Droid-Developers
The chip does auto increment of the address.
So you just need

Read Free Configuring The Bq34z100 Data Flash Ti

to send 0x0C and read 2 Bytes.

This way you read the value at address 0x0C first and then the value at address 0x0D (0x0C + 1). You can also use the extended command 0x2a/0x2b for retrieving the temperature.
