Connecting Android With Delphi DataSnap Server - TechyLib

Last week Jim McKeeth introduced DataSnap clients for Android with a very nice video, linked at the bottom of this page. He showed how to build a client using the same technologies available for all other platforms Delphi supports.

Connect to DataSnap Server (FireDAC) - RAD Studio

This tutorial describes how to connect to an Enterprise database from a mobile client application. To connect to an Enterprise Database, you need to have a client library. In most cases, the client library is provided by the database vendor in DLL format. This strategy does not work well for mobile devices because no client library is available.
