Assign or Change the IP Address of the Printer ... - Xerox

On - The printer attempts to assign an IP Address using the Auto IP Protocol. This protocol enables a network device to assign an IP Address to the device when DHCP/BOOTP requests for IP address assignment fail, and the device has no static IP address. The IP address assigned is in the range of 169.254.1.0 to 169.254.254.255.

How to Find Your IP Address - Lifewire

Logging IP Addresses of All Incoming TCP Connections. IP addresses for all incoming TCP connections are logged by the syslog service, at the daemon.notice facility and level. The information is located in /var/adm/messages, unless you changed the local syslog.conf file setup. Note that changing the syslog.conf file setup can affect where this information is stored.

Xerox WorkCentre 5019/5021 Network Addendum

The other address a router holds is the public IP address that has to be assigned to the network in order for the devices in the network to reach the internet. This address, sometimes called the WAN IP Address, is stored in different places depending on the router. This IP address, however, isn't the same as the router's local address.

Configure a Static Network Address (IP Address ... - Xerox

To avoid having the IP address reassigned, give the printer an address at the higher end of the range allowed by the router or device. For example, if your computer has IP address 192.168.1.2, and your device allows IP addresses to 192.168.1.255, select an address between 192.168.1.200 and 192.168.1.254.
