Pearson - Database Systems: A Practical Approach to Design ...

An attribute is a property that describes for the object, and a relationship is an association between entities (Connolly & Begg, 2015, p46). Record-based data models consist of a number of fixed format records, possibly of differing types. Each record type defines a fixed number of fields, typically of a fixed length (Connolly & Begg, 2015, p46).
