Practice: Metric conversions word problems. This is the currently selected item. Next lesson. Estimating to nearest ten, hundred, or thousand. Multi-step unit conversion examples (metric) Our mission is to provide a free, world-class education to anyone, anywhere.

Conversion Practice Problems With Answers

Perhaps you can determine the answer in your head. If there are 100 cm in every meter, then 3.55 m equals 355 cm. To solve the problem more formally with a conversion factor, we first write the quantity we are given, 3.55 m. Then we multiply this quantity by a conversion factor, which is the same as multiplying it by 1.
