### What Coolant Color Should I Use In A Champion Radiator?

Radiator coolant, sometimes called antifreeze, is the green, yellow, or orangish liquid that fills your car's radiator. The coolant in your radiator is a 50/50 mixture of commercial coolant and water, and together this solution makes a liquid that helps cool your engine by circulating through the cooling system.

### Radiator Fluid Colors Vary and How To Pick the Right One ...

Using pre-diluted coolant, as opposed to concentrated or full-strength, is an easy, no-fuss way to ensure your radiator has the proper 50/50 mixture of coolant and water. Run the engine until the cooling system stops bubbling and the coolant level starts to rise, then put the radiator cap back on the system.

### Genuine Toyota Long Life RED Coolant 5 Litres - Pre-Mixed

Type A coolant is much more. Also usually the premixes are mixed a 2:1 ratio, you might want it more concentrated (say 1:1) depending on the car. I use nulon red (type A) at 1:1 ratio in my 3sgte. \*hearts\* his 4age powered KE70 Panelvan!
