Corrosion Inspection and Control in Refineries

The refining of crude oil into usable products is a complex process with many opportunities for corrosion to gain a foothold. Understanding the typical atmospheric distillation process flow in a crude oil refinery is a valuable tool to help identify corrosion and implement controls in those locations where corrosion is likely to occur.

Corrosion In Oil Refineries Inspection Monitoring And Control

In petroleum refineries, corrosion of equipment takes place all through its operating life. It is essential to monitor the corrosion damage so that timely corrective actions like maintenance / repairs / rehabilitation of equipment can be undertaken before it causes unsafe plant operations.

Corrosion monitoring in petroleum refineries

Conclusions Corrosion costs the world refinery industry billions of dollars annually. Although one of the major contributors to corrosion is the pH value of process water, pH measurements in oil refinery service have acquired a bad reputation due to their poor ability to measure in the aggressive environment they have to contend with.

Operators of refineries are reminded to take all necessary measures to prevent major accidents including appropriate inspection and maintenance programmes.

REFINERY INSPECTION AREAS OF VULNERABILITY

The primary objective of the various lubricating oil refinery processes is to remove asphalts, sulfonated aromatics, and paraffinic and isoparaffinic waxes from residual fractions. reduced crude from the vacuum unit is deasphalted and combined with straight-run lubricating oil feedstock, preheated, and solvent-extracted (usually with phenol or furfural) to produce raffinate.

Battling Corrosion in Refineries - - With the Power of In ...

It is a well-known corrosion in different units in oil refineries. The amount of total sulfur in a crude oil depends on the type of oil field and it varies from 0.05% to 14%. Of course, sulfur values as low as 0.2% are enough to create sulfidation corrosion in plain steels and low alloy steels.
