CP 3 - Cathodic Protection Technologist - NACE GB

Cathodic protection (CP) is a technique used to control the corrosion of a metal surface by making it the cathode of an electrochemical cell. A simple method of protection connects the metal to be protected to a more easily corroded "sacrificial metal" to act as the anode. The sacrificial metal then corrodes instead of the protected metal.

Cathodic protection - Wikipedia

3+ years of experience in the corrosion control industry particularly related to cathodic protection Working knowledge of British / NACE / ISO standards with respect to CP Strong written and oral communications skills Must be able to work with a team, take direction from supervisor(s), prioritise work schedule,
