Crabs

Crabs often show marked sexual dimorphism. Males often have larger claws, a tendency that is particularly pronounced in the fiddler crabs of the genus *Uca* (). In fiddler crabs, males have one greatly enlarged claw used for communication, particularly for attracting a mate. Another conspicuous difference is the form of the pleon (); in most male crabs, this is narrow and triangular in form.

Crabs (Pubic Lice) Pictures, Symptoms, Treatment, Cure

Crabs STD: Tiny insects that live off human blood. Although they're often found around the genital area, they can live in any part of the body with hair. Crabs are usually transmitted via close contact with an infected person including sex. It is commonly followed by various symptoms and side effects including itching.

Steamed or Live Blue Crabs – Crab Depot

Pubic lice, commonly called crabs, are tiny insects found in your genital area. They are a different type of louse from head lice and body lice. Measuring 1/16 inch (1.6 millimeters) or less, pubic lice are called crabs because their bodies resemble tiny crabs. The most common way to get pubic lice is through sexual activity.
