The second cut you will make in your run will be around the 185 - 190 degree temperature range. The distillate collected after the foreshots and before the second cut is called the "heads" of the run. Set the heads aside for further distillation, or to combine the right amount with your final distillate to flavor the alcohol the way you like.

Final Cut Pro has been the standard by which all video editors are compared. I've switched platforms from a PC using Adobe Premiere to Mac's OS X using Final Cut Express HD. Compared to Premiere, Final Cut is blazingly fast and has a superior interface. Final Cut Pro and Final Cut Express HD have a near identical interface.
