4 Types Of Benchmarking In Healthcare (& The Benefits Of Each)

Benchmarking is used to measure performance using a specific indicator (cost per unit of measure, productivity per unit of measure, cycle time of x per unit of measure or defects per unit of measure) resulting in a metric of performance that is then compared to others.

Brief review of measuring

Where To Download Data Science Benchmarking Performance Measurement

returns - Performance ...

A performance measure is a numeric description of an agency's work and the results of that work.

Performance measures are based on data, and tell a story about whether an agency or activity is achieving its objectives and if progress is being made toward attaining policy or organizational goals.
