Audio data compression, not to be confused with dynamic range compression, has the potential to reduce the transmission bandwidth and storage requirements of audio data. Audio compression algorithms are implemented in software as audio codecs.In both lossy and lossless audio compression, using methods such as coding, quantization, discrete cosine transform and ...

1.2 Data Abstraction. Object-oriented programming. Programming in Java is largely based on building data types. This style of programming is known as object-oriented programming, as it revolves around the concept of an object, an entity that holds a data type value.With Java's primitive programs that operate on numbers, but with reference types we can write ...
