*EMI reduction with X2Y caps (Brushed DC Motor) - Page 1
The need for noise suppression in DC motors used around the world is on the increase. X2Y® is a single component EMI filter that has met the most stringent EMC requirements including those imposed by automotive manufacturing companies.*

*X2Y® DC Motor Filtering Basics - Johanson Dielectrics, Inc.
By analyzing the test data, we design and add the X2Y filter to the DC motor, and test its all-frequency characteristics. The results show that the X2Y filter can effectively suppress the conducted and radiated electromagnetic interference of DC motor, which can greatly enhance the electromagnetic compatibility characteristics of the DC motor.*

EMI reduction with X2Y caps (Brushed DC Motor) ... I was trying to lower the EMI with some ferrite ring, motor lead twisting, metal shiled cover on back of the motor (covering leads) and simple LC filter with 2 WE7427511 in series and 22nF block but all this attempts failed to pass, it lowers EMI a bit but still left some peaks over the limit. ...*

Yes, those brushes are installed incorrectly (90° out)! That's going to be contributing a lot to arcing on the comutator, it might improve with time, but it's going to take a long time for them to wear down to anything like the right profile - I'd reject it and try another one.*
