Paul Deitel Created August 12, 2015 20:56. Comment actions Permalink. Thanks for the help guys! ... Desktop, somehow while attempting to type open and closed curly braces (both of which typed). I couldn't find any solution to trigger it back, from attempting to finger-fumble re-discover the initial trigger, to all the suggestions here and some ...

Fluent Python, 2nd Edition [Book] - O'Reilly  
3rd Example - Splitting String with leading and trailing whitespace Splitting a String by white space becomes tricky when your input string contains leading or trailing whitespaces because they will match the `\\s+` regular expression and empty String will be inserted into the output array. To avoid that you should trim the String before splitting it i.e. call the `trim()` before calling `split()`.

Deitel And Solution  
Java How to Program, 11/e, Early Objects provides a clear, simple, engaging and entertaining introduction to Java, preparing college students to meet the Java programming challenges they'll encounter in upper-level courses and in industry. The earliest known reference to the knight's tour problem dates back to the 9th century AD. In Rudra's Kavyalankara (5.15), a Sanskrit work on Poetics, the pattern of a knight's tour on a half-board has been presented as an elaborate poetic figure (citra-alaṅkāra) called the turagapadabandha or 'arrangement in the steps of a horse'. The same verse in four lines of eight syllables each ...
