Ventec Life Systems and GM Partner to Mass Produce ...

Critical care usually takes place in an intensive care unit (ICU) or trauma center. Monitors, intravenous (IV) tubes, feeding tubes, catheters, breathing machines, and other equipment are common in critical care units. They can keep a person alive, but can also increase the risk of infection. Many patients in critical care recover, but some die.

Guidelines for Intensive Care Unit Design

Critical Care is a high-quality, peer-reviewed, international clinical medical journal. Critical Care aims to improve the care of critically ill patients by acquiring, discussing, distributing, and promoting evidence-based information relevant to intensivists. Critical Care aims to provide a comprehensive overview of the intensive care field.
