7 Best books to learn Design Patterns for Java Programmers ...  
A popular metaphor for design versus coding is the architect who gives blueprints to the builder, and the builder represents the programmer. But it's an imperfect metaphor because it forgets the compiler, which does the same thing as the builder in the architect metaphor.

How to design a computer program - Software Engineering Tips  
Programmers write programs according to the specifications determined primarily by more senior programmers and by system analysts. After the design process is complete, it is the job of the programmer to convert that design into a logical series of instructions that the computer can follow.
