This hands-on, user-centric approach is defined by the design thinking process and comprises 6 distinct phases, as defined and illustrated below. How — The Process. The design-thinking framework follows an overall flow of 1) understand, 2) explore, and 3) materialize. Within these larger buckets fall the 6 phases: empathize, define, ideate ...

Service blueprints are diagrams that visualize organizational processes in order to optimize how a business delivers a user experience. They are the primary tool used in service design.. Similar to journey mapping, service blueprinting should be the result of a collaborative process informed by well-defined goals and built on research. Successful service blueprints drive alignment and ...
