In 2013, the Internet of Things was everywhere: more startups, services and platforms launching and coming out of beta. Last month, CES was awash with connected-this and smart-that and while much of this is in the early-adopter stage, what's remarkable is that the price and size are making possible futuristic products which were unimaginable a few years ago.

### **Designing for the Internet of Things**

He has been connecting devices to the Internet since 1995—first cash registers, then mobile phones, and now bubble machines and lamps. He founded MCQN Ltd., an Internet of Things product agency and (along with Hakim and others) is co-founder of DoES Liverpool, a hybrid co-working/ makerspace that incubates Internet of Things startups in NW England.

### **Designing for Internet of Things in Manufacturing**

If you'd like to design for the future, Designing the Internet of Things is a great place to start. About the Author. Adrian McEwen (Liverpool, UK) is an Internet of Things expert. He co-wrote and runs the Howduino course, teaching about Arduino across the UK. Adrian is the curator of official Arduino Ethernet Library.
