Diabetes: Translating Research into Practice ...
Diabetes has garnered worldwide attention and research funding as clinicians and researchers seek to better understand its pathogenesis, prevention, complications management, and impact and relationship to other diseases (heart disease, kidney disease, infections, and inflammation). Clinicians are overwhelmed with rapidly evolving developments regarding the science and clinical management of ...

Diabetes: Translating Research into Practice - 1st Edition ...
Diabetes and its care have captured the attention of clinicians, managed care, regulatory agencies, and the media. Several successful trials over the past decade have brought the issue of translating evidence-based findings on diabetes care into practice to the forefront of health care discussions (1-3). Despite these promising advances, it is well documented that there is a large gap ...

Diabetes GPwSI to look at translating evidence into practice “Just because we are in a pandemic, does not excuse therapeutic inertia,” says Dr Naresh Kanumilli. The GPwSI, who has a special interest in diabetes and cardiology, says COVID-19 has only made it more important that people with type 1 or type 2 are well looked after.

Diabetes GPwSI to look at translating evidence into practice

Translating Research into Practice (TRIP) Conference will highlight two challenging areas for TRIP: obesity and health disparities reduction. In addition, the conference will continue to provide an opportunity to share innovative TRIP research and implementation methods, case studies and other experiences.
