We established a 2-step biochemical differential diagnosis for C210HD and PORD by urinary steroid profile. First, by using a specific cutoff of the ratio of Ptl to THEs, we were able to differentiate C210HD and PORD from TH170HP and controls. Second, by using a specific cutoff of 11HA, we were able to distinguish between C210HD and PORD.

Surgery for carpal tunnel syndrome has a very high success rate of over 90%. Many symptoms are relieved quickly after treatment, including tingling sensation in the hands and waking up at night. Numbness may take longer to be relieved, even up to three months. Surgery won't help if carpal tunnel syndrome is the wrong diagnosis.

Tenosynovitis: Practice Essentials, Pathophysiology, Etiology

“The differential diagnosis for patients who present with abnormalities on chest x-ray includes lung cancer, as well as nonmalignant diseases. These include infectious causes such as tuberculosis or pneumonia, or inflammatory conditions such as sarcoidosis. These diseases can result in mediastinal lymphadenopathy or lung nodules, and sometimes mimic lung cancers.”
