How to Process Infrared Photographs

On the contrary, today's digital cameras can be excellent for infrared photography. You just have to remove the infrared light-blocking filter on their sensors, purchase a digital camera without such a filter, or use an infrared filter on the lens. Some digital cameras like the Sigma SD14 make it easy to remove the infrared light-blocking filter. All it takes is removing the lens to get at the filter behind it and then pushing said filter up to release it.
