DNA: Structure and Replication
Well, I won't say it has not been done, because there is already a cloned sheep you probably know about. Do you need some help understanding DNA replication? Take this quiz with answers and refresh your memory before the test.

Worksheet - Structure of DNA and Replication
Answer: Because the DNA polymerase is capable of adding new nucleotides only at the 3' end of a DNA strand, and because the two strands are antiparallel, at least two molecules of DNA polymerase must be involved in the replication of any specific region of DNA. When a region becomes single-stranded, the two strands have an opposite orientation.

DNA QUIZ 1 - The Biology Corner
Directions: Answer each question, you do not need complete sentences. 11. What do the letters DNA stand for? 12. Where is DNA found? 13. What is the first step in the process of DNA replication? 14. Which enzyme is responsible for "unzipping" the DNA double helix? 15. Which enzyme is responsible for bonding the nucleotides in a new DNA ...
