File Type PDF Docker Up Running

When docker-compose up runs, if it finds any containers from previous runs, it copies the volumes from the old container to the new container. This process ensures that any data you've created in volumes isn't lost.

Docker: Up and Running | Live Training

If you want to run your services in the background, you can pass the `-d` flag (for “detached” mode) to `docker-compose up` and use `docker-compose ps` to see what is currently running:

Amazon.com: docker up & running

The `docker-compose run` command is for running “one-off” or “ad-hoc” tasks. It requires the service name you want to run and only starts containers for services that the running service depends
