*Double vision (Diplopia): Causes, diagnosis, and treatment*

*Double vision is the perception of two images of a single object seen adjacent to each other (horizontally, vertically, or obliquely) or overlapping. Diplopia is the medical term for double vision. Polyopia is the perception of three or more images of a single object overlapping each other. Double vision is called "monocular" when the double image is perceived by an eye that is tested alone.*

*Double vision affecting both eyes  
(binocular) Double vision affecting  
both eyes is usually a symptom of a  
squint. This is where problems with the  
eye muscles or nerves cause the eyes  
to look in slightly different directions.  
Squints are more common in children  
but they don't always cause double  
vision.*
