It's a great introduction to buying better quality lenses. And an excellent way of getting to grips with aperture. The article linked is a review and guide. I wrote it because I recommend this lens as the first upgrade for every beginner photographer to make.

Camera Selection Guide - Underwater Photography Guide

As with every camera, there are crop and full-frame versions of Canon and Nikon as well. The term crop factor describes the magnification any particular lens produces when you use it on a crop-sensor camera. This number differs between the two camera brands. The crop factor of Nikon crop-sensor cameras is 1.5x. For Canon, the crop factor is 1.6x.
