DSM-IV-TR, a text revision of DSM-IV, was introduced in 2000. Although major diagnostic criteria have remained essentially the same as those in DSM-IV, the text revision updates information about associated features, course, and prevalence with new research, and it updates ICD-9 codes from 1994 when the DSM-IV was completed. The section on ...

Narcissistic personality disorder (NPD) or megalomania is a personality disorder characterized by a long-term pattern of exaggerated feelings of self-importance, an excessive craving for admiration, and struggles with empathy. People with NPD often spend much time daydreaming about achieving power and success, and the perceived injustice of failing to do so.
