MultiChoice recommends the Dstv Smart LNB for all DStv Explora and most XtraView installations (when installed in a Single Unit Dwelling, ie. where customers make use of their own satellite dish). From a technical viewpoint, the DStv Smart LNB combines the features of a Dstv Switch into a single UniCable LNB and offers a single cable solution for distribution of multiple satellite signals.

Dstv HD Decoder Manuals | ManualsLib

The DStv satellite dish is an antenna through which your decoder receives a DStv signal. It consists of a metallic dish and an LNB. MultiChoice recommends the use of a 90cm dish for the best signal reception. In most cases, you mount the dish on top of a roof where there is a clear and unobstructed line of signal.

DStv Smart LNB

If you are having a new dish installation done, a twin-feed LNB must be used. This means that there will be two cables running between the dish and the decoder. If you already have a dish and an installer is going to install the decoder, it is recommended that the existing dish installation be modified to a twin-feed LNB.
