Dual Diagnosis treatment is a relatively new innovation in the field of addiction recovery. Until the 1990s, people who were experiencing symptoms of a mental health disorder – anxiety attacks, depressive episodes, delusional behavior or mood swings – were treated separately from those who sought help for drug or alcohol abuse. When these conditions overlapped, clients were often denied

## File Type PDF Dual Diagnosis

Dual diagnosis (also referred to as co-occurring disorders) is a term for when someone experiences a mental illness and a substance use disorder simultaneously. Either disorder—substance use or mental illness—can develop first. People experiencing a mental health condition may turn to alcohol or other drugs as a form of self-medication to improve the mental health symptoms they experience.
