Equity Theory - an overview | ScienceDirect Topics
There have been instances where fund managers wrongly guessed RBI and suffered losses. In fact, dynamic funds lost their charm after these schemes were hit by a bad money market and the lack of firm cues on interest rates in 2019. However, at least in theory it makes sense to get a professional to take a call on interest rates.

A Markov chain or Markov process is a stochastic model describing a sequence of possible events in which the probability of each event depends only on the state attained in the previous event. Informally, this may be thought of as, "What happens next depends only on the state of affairs now." A countably infinite sequence, in which the chain moves state at discrete time steps, gives a discrete ...
