Early Spay-Neuter Considerations for the Canine Athlete ...

Behavior considerations. Early age gonadectomy was associated with an increased incidence of noise phobias and undesirable sexual behaviors, such as mounting. 27 Significantly more behavioral problems were seen in spayed and neutered bitches and dogs, with fearful behavior being most common in spayed bitches and aggression in neutered dogs. 28, 29 In a prospective study, German shepherds ...

EARLY SPAY-NEUTER IN THE CANINE ATHLETE | TheDogPlace.org

In February 2014, a study was completed on over 2500 Vizsla dogs and the results were a blow to those who vehemently defend spay/neuter. But this latest study is just the most recent of a long line of work showing that removing a quarter of the dog's endocrine system might not be in the dog's best interests - and maybe not even in the best interests of rescues and shelters.

Early Spay-Neuter Considerations for the Canine Athlete ...

AKC Canine Health Foundation-funded research investigates health implications in early spay and neuter in dogs. A team of researchers led by Dr. Benjamin L. Hart at the University of California, Davis has completed the most detailed study performed to date, and recent results have the potential to significantly impact recommendations for spaying and neutering dogs in the United States.

Spay-Neuter Considerations - Regency Ranch Golden Retrievers

The study that identified a higher incidence of cranial cruciate ligament rupture in spayed or neutered dogs also identified an increased incidence of sexual behaviors in males and females that were neutered early. (3) Further, the study that identified a higher incidence of hip dysplasia in dogs neutered or spayed before 5 1/2 months also showed that early age gonadectomy was associated with ...

Early Spay Neuter Considerations For

behavioral effects of spay/neuter for canine athletes was a finding of a significantly lowered energy level. This was shown in a study that was well controlled and examined over 3500 dogs. (26) Other Health Considerations • Female, and sometimes male, dogs that are spayed/neutered before puberty have an increased risk of
