Why are polar bears found
only in the Arctic? Why does
mildew grow in your shower
and not (hopefully) in your
sock drawer? Learn how
ecologists study the
interactions between
organisms and their
environment, and how these
interactions affect where,
and in what numbers,
different types of organisms
are found.

German zoologist, Ernst Haeckel, in 1866 to describe the “economies” of living forms. [] The theoretical practice of ecology consists, by and large, of the construction of models of the interaction of living systems with their environment (including other living systems). [] These models are then tested in the laboratory and the field.

ports of Los Angeles and Long Beach.

Ecology

Ecology; Ecology addresses the full scale of life, from tiny bacteria to processes that span the entire planet. Ecologists study many diverse and complex relations among species, such as predation and pollination. The diversity of life is organized into different habitats, from terrestrial (middle) to aquatic ecosystems.
