Ecosystem Services Chapter 12 Ecosystem

Even a few of them are considered sacred. Moreover, ecosystems provide enormous economic benefits in the name of tourism. The price tagging of the ecosystems and their services is quite unfeasible. Among all the ecosystem services, supporting services alone contribute about 50% and the rest of the services account for less than 10% in the same.

Of Ecosystem Services

Ecosystem Services are the processes by which the environment produces resources that we often take for granted such as clean water, timber, and habitat for fisheries, and pollination of native and agricultural plants. Whether we find ourselves in the city or a rural area, the

Ecosystems and Human Well-Being: Current State and Trends

In this chapter, Cagan H. Sekercioglu recapitulates natural ecosystem functions and services. Ecosystem services are the set of ecosystem functions that are useful to humans. These services make the planet inhabitable by supplying and purifying the air we breathe and the water we drink. Water, carbon, nitrogen, phosphorus, and sulfur are the major global biogeochemical cycles.
