SPECIAL RELATIVITY (Einstein 1905) Based on two postulates: The RELATIVITY PRINCIPLE: the laws of physics are the same in all inertial frames. The CONSTANCY OF THE SPEED OF LIGHT: the speed of light, $c=299,792$ km/s, is the same for all inertial observers, independent of their velocity of motion relative to the source of light.

Einstein's Theory of Special Relativity | Space

Basically, special relativity can be stated as the invariance of any spacetime interval (that is the 4D distance between any two events) when viewed from any inertial reference frame. All equations and effects of special relativity can be derived from this rotational symmetry (the Poincaré group) of Minkowski spacetime.

Galilean Electrodynamics,

Albert Einstein determined that massive objects cause a distortion in space-time, which is felt as gravity. This formed the basis of this theory of general relativity.
