[F] : Represents a part (all parts are shown in sky blue). The code is the same as the code used in parts position. [G] : Junction Block (The number in the circle is the J/B. No. and the connector code is shown beside it). Junction Blocks are shaded to clearly separate them from other parts.

Exploded Parts Diagrams for John Deere (Front Axle)
The easiest method to follow is very straightforward. Find the MAX advance point your engine tolerates (between 30-40 degrees BTDC) above 3000 RPM. Now find the place where it responds best at idle. It may be 15-24 degrees BTDC. You may find that this much advance causes starting difficulties when the engine is hot, so be sure to check this out!

Engine Parts Diagram Names
CYLINDER HEADS: The L3 Cylinder Heads, bored to 90.5/92mm bore size, are what make the whole thing work.We are assuming you are using Stock Heater Boxes, or simple 1 3/8" (Stock size) replacement J-pipes?You can use a 1 1/2" exhaust if you already have it, but don't go any bigger than that, because that's a different "class" of engine than this article is covering.
