*Fundamentals of Probability and Statistics for Engineers ...  
as probability theory tells us to multiply the probability of the (independent) individual outcomes. Whereas probability theory is uncontroversial, the meaning of probability is sometimes debated. Statistics is concerned with the analysis of collections of observations. Rasmussen (CUED) Lecture 1: Probability Fundamentals January 18th, 2019 4/16*

**Like a probability measure in probability theory, a basic probability assignment lies in the foundations of evidence theory, also known as the Dempster-Shafer theory (Dempster, 1967), (Shafer, 1976). A basic probability assignment is a mapping  $m$  from the set of all subsets of a universal finite nonempty set  $X$  to the interval  $[0, 1]$ , but it need not meet all the probability measure requirements.**
