platforms. The devices that can be supported over the eSPI interface includes but not necessary limited to Embedded Controller (EC), Baseboard Management Controller (BMC), Super-I/O (SIO) and Port-80 debug card.

Get Free Enhanced Serial Peripheral Interface Espi

Enhanced Serial Peripheral Interface (eSPI)

The eSPI (enhanced serial peripheral interface) is a serial bus that is based on SPI. The features include a four-wire interface (receive, transmit, clock and slave select) and three configurations:
