Environmental taxation - OECD

Climate change is an important issue to many people, yet support for policies to ameliorate climate change dwindles when the poor and middle class are asked to pay a cost. That is a problem.

Environmental taxes, reliefs and schemes for businesses ...

Human-caused climate change is an environmental issue we will need to address over the course of this century. However, how much risk countries face from climate change is determined by wealth and standard of living rather than exactly how much the climate changes. Many people living in poor countries are vulnerable to extreme weather today.
