Osteopenia - StatPearls - NCBI Bookshelf

Content Description Step 2 CK assesses an examinee's ability to apply medical knowledge, skills, and understanding of clinical science essential for the provision of patient care under supervision and includes emphasis on health promotion and disease prevention. Step 2 CK ensures that attention is devoted to principles of clinical sciences and basic patient-centered skills that provide a foundation for clinical practice.

About the a-IPC TM Exam - CBIC

Osteopenia is a clinical term used to describe a decrease in bone mineral density (BMD) below normal reference values, yet not low enough to meet the diagnostic criteria to be considered osteoporotic[1]. BMD is diagnosed via dual-energy x-ray absorptiometry (DXA) bone scans. Osteoporosis, as defined by the World Health Organization (WHO), is a t-score between -1 to -2.5, while values less than -2.5 are considered osteoporotic.

Features, Evaluation, and Treatment of Coronavirus (COVID-19)

These questions present a word and then prompt you to select the answer choice that is the given word's antonym, or opposite. Similar to this question type is the test's Synonym questions, which present a word and ask you to pick out the answer choice that is its closest synonym.
