Essentialism is the view that objects have a set of attributes that are necessary to their identity. In early Western thought, Plato's idealism held that all things have such an "essence"—an "idea" or "form".In Categories, Aristotle similarly proposed that all objects have a substance that, as George Lakoff put it, "make the thing what it is, and without which it would be not that kind of ...

Essential genes contain fewer insertions in the inactivating orientation. Sample data for two neighboring genes RPL14, encoding an essential ribosomal protein, and ZNF619, encoding a dispensable zinc finger protein, are displayed. For CRISPR/Cas9, sgRNAs are plotted according to their target position along each gene with the height of each bar ...
