Bat detector choices are influenced by factors such as your experience, the mode of operation you want (e.g. hand-held or passive) and type of technology (heterodyne, fixed frequency, time expansion or full-spectrum). Heterodyne detectors are great for beginners, but professional biologists and workers will also turn to the more technologically advanced models which allow extensive recording and ...

Evolution Of The Earth Prothero

The creation–evolution controversy began in Europe and North America in the late 18th century when new interpretations of geological evidence led to various theories of an ancient Earth, and findings of extinctions demonstrated in the fossil geological sequence prompted early ideas of evolution, notably Lamarckism. In England these ideas of continuing change were at first seen as a threat to ...

Evolution - Simple English Wikipedia, the free encyclopedia

A fossil (from Classical Latin: fossilis, literally 'obtained by digging') is any preserved remains, impression, or trace of any once-living thing from a past geological age. Examples include bone fragments, shells, exoskeletons, stone imprints of animals or microbes, objects preserved in amber, hair, petrified wood, oil, coal, and DNA remnants. The totality of fossils is known as the fossil record.

Mammoths and modern elephants overlap significantly in body mass. The biggest African bush elephants may stand roughly as tall as did the titanic Columbian mammoth of North America, some 13 feet at the shoulder, but the largest mammoths probably generally outweighed elephants because of thicker leg bones, but there are prehistoric examples of "insular dwarfism" in both elephants and mammoths.

Cetaceans (whales, dolphins, and porpoises) are an order of mammals that originated about 50 million years ago in the Eocene epoch. Even though all modern cetaceans are obligate aquatic mammals, early cetaceans were amphibious, and their ancestors were terrestrial artiodactyls, similar to small deer. The transition from land to water is documented by a series of intermediate fossils, many of ...
