Working with IF Functions in Excel 2016. Related Book. Office 2016 For Seniors For Dummies. By Faithe Wempen . Excel's IF function intimidates a lot of people, but it's really not that conceptually difficult. The IF function determines whether a statement is true or false, and then takes one of two actions depending on the answer.

Functions in Excel 2016 Formulas - dummies

The Excel AND function is a logical function used to require more than one condition at the same time. AND returns either TRUE or FALSE. To test if a number in A1 is greater than zero and less than 10, use =AND(A1>0,A1.10).. The AND function can be used as the logical test inside the IF function to avoid extra nested IFs, and can be combined with the OR function.
