Chapter 4 Time Value of Money Part 2 FINA 2303 513 ...

In finance, the time value (TV) (extrinsic or instrumental value) of an option is the premium a rational investor would pay over its current exercise value (intrinsic value), based on the probability it will increase in value before expiry. For an American option this value is always greater than zero in a fair market, thus an option is always worth more than its current exercise value.

Exercise 2 Time Value Of

Early exercise gives the holder of an American option the right to buy/sell their contract earlier than the expiration date if the option is at-the-money or in-the-money. European option holders do not have this luxury, and their exercise value is the value of the contract at expiration. Time Value of an Option. Time value also affects the ...
