Exhaust and emission aftertreatment systems explained ...

Heavy duty diesel engine aftertreatment systems were introduced as a solution to aid in reducing both PM and NOx emissions! Generally speaking, the heavy duty diesel engine aftertreatment system has two primary components: the exhaust aftertreatment technology - which includes the diesel oxidation catalyst (DOC) and diesel particulate filter (DPF) - to reduce and mitigate PM; and a ...

Engine Aftertreatment Systems (Y53-6091-1B1)

Exhaust gas temperature sensors monitor the system temperatures. NOx sensors measure the NOx conversion. PM (particulate matter) sensors, also known as soot sensors, measure particulates in the exhaust (mainly ash and soot). All of these sensors indicate when the aftertreatment system needs repair or maintenance. Aftertreatment system maintenance
