Expanding Universe Worksheet | Free Printables Worksheet

Today, the evidence that we live in an expanding universe is extremely strong, because astronomers have measured the motions of millions of galaxies.

Nevertheless, in science, we must always remain open to the possibility that some future observation could call even our most strongly supported theories into question.

Stars, Galaxies, and the Universe The Expanding Universe

Download File PDF Expanding Universe Guided Answers

Secular scientists once believed that the universe was eternal and unchanging. However, most astronomers today believe that the universe is indeed expanding. In the 1920s, astronomers discovered that virtually all clusters of galaxies appear to be moving away from all other clusters; this indicates that the entire universe is expanding.

Astronomy Study Guide Answers Flashcards | Quizlet
The universe has been expanding. What is cosmic background radiation? the leftover thermal (heat) energy from the Big Bang. According to the textbook, how old is the universe? 13.7 billion years old: What is the likely end of our universe? The universe will continue to expand
